IMBM MATH DAYS

June 7, 2012

13:00-13:45 Jim Davis (Indiana University) *Free, homologically trivial actions on a product of spheres*

14:00-14:45 Ergün Yalçın (Bilkent University) *Free actions on products of spheres at high dimensions*

15:00-15:45 Atabey Kaygun (Bahçeşehir University) *Jacobi Zariski exact sequence for Hochschild homology and cyclic (co)homology*

16:00-16:45 Olcay Coşkun (Boğaziçi University) *Fibred Bisets*

June 8, 2012

09:00-09:45 Alejandro Adem (University of British Columbia) *Equivariant K-theory and spaces of commuting elements in a compact Lie group*

10:00-10:45 Özgün Ünlü (Bilkent University) *Constructing homologically trivial actions on products of spheres*

11:00-11:45 Arzu Boysal (Boğaziçi University) *G-bundles on curves and some duality relations*

Place: IMBM Seminar Room, Boğaziçi University South Campus

This workshop is partially sponsored by IMBM.

Jim Davis's visit is partially supported by the Boğaziçi University Foundation (BÜVAK).
