DIXMIER SETS, NUMERICAL RANGES, COMMUTATION AND SPLITTING THEOREMS

Şerban Strătilă

Institute of Mathematics of the Romanian Academy

Abstract

The aim of this expository talk is to connect in the simplest case, that of factors, works done on Dixmier sets and algebraic reduction theory, with commutation theorems and splitting theorems for operator algebras obtained in the last years.

Date : Friday, October 7, 2011

Time: 15:40

Place: Sabancı University, Karaköy Communication Center
Bankalar Caddesi 2, Karaköy 34420, İstanbul

This visit is partially sponsored by the grant TÜBİTAK-107T896.
